Vitamin D Analogs for Treating Bone Cancers and Diseases

INVENTORS • Hector DeLuca, Margaret Clagett-Dame, Lori Plum, Izabela Sibilska, Rafal Sicinski

WARF: P100358US03
View U.S. Patent No. 8,993,547 in PDF format.

The Wisconsin Alumni Research Foundation (WARF) is seeking commercial partners interested in developing vitamin D analogs with high calcemic activity that may be useful as anti-cancer agents, especially in the treatment and prevention of osteosarcomas.

OVERVIEW

The hormonally active form of vitamin D, known as calcitriol or 1,25 dihydroxyvitamin D₃, has shown promise for treating diseases ranging from osteoporosis to cancer to psoriasis. However, the hormone mobilizes calcium from bones and increases intestinal absorption of dietary calcium. Effective therapeutic concentrations can lead to hypercalcemia; a condition characterized by elevated blood calcium levels, alterations in mental status, muscle weakness and calcification of soft tissues and organs such as the heart and kidneys. Therefore, a need exists for new compounds that provide desirable therapeutic effects without causing dose-limiting hypercalcemia.

THE INVENTION

UW–Madison researchers have developed vitamin D analogs, (20S)-3-desoxy-2-methylene-1α,25-dihydroxy-19-nor-vitamin D₃ and (20R)-3-desoxy-2-methylene-1α,25-dihydroxy-19-nor-vitamin D₃. These compounds exhibit promising anti-cancer activities: high receptor binding, and the arrest and induced-differentiation of proliferating cells. High calcemic mobilization suggests particular effectiveness in the treatment of bone diseases.

APPLICATIONS

• Therapy for bone diseases, osteoporosis and osteosarcoma
• Prevention and treatment of leukemia, skin cancer, breast cancer, colon cancer and prostate cancer

KEY BENEFITS

• High bone calcium mobilization

THE WARF ADVANTAGE

WARF: A Leader in Technology Transfer Since 1925
Since its founding as a private, nonprofit affiliate of the University of Wisconsin–Madison, WARF has provided patent and licensing services to UW–Madison and worked with commercial partners to transform university research into products that benefit society. WARF intellectual property managers and licensing staff members are leaders in the field of university-based technology transfer. They are familiar with the intricacies of patenting, have worked with researchers in relevant disciplines, understand industries and markets, and have negotiated innovative licensing strategies to meet the individual needs of business clients.

The University of Wisconsin and WARF – A Single Location to Accelerate Translational Development of New Drugs
UW–Madison has the integrative capabilities to complete many key components of the drug development cycle, from discovery through clinical trials. As one of the top research universities in the world, and one of the two best-funded universities for research in the country, UW–Madison offers state-of-the-art facilities unmatched by most public universities.

These include the Small Molecule Screening Facility at the UW Comprehensive Cancer Center; the Zeeh Pharmaceutical Experiment Station, which provides consulting and laboratory services for developing formulations and studying solubility, stability and more; the Waisman Clinical Biomanufacturing Facility; the Wisconsin Institute for Medical Research, which provides UW–Madison with a complete translational research facility; and the innovative, interdisciplinary Wisconsin Institutes for Discovery, home to the private, nonprofit Morgridge Institute for Research and its public twin, WID, part of the university's graduate school. The highly qualified experts at these facilities are ready to work with you to create a library of candidates for drug development.
• Lower intestinal calcium transport activity
• Can be administered in many forms

ADDITIONAL INFORMATION

Tech Fields
Pharmaceuticals & Vitamin D - Vitamin D
Pharmaceuticals & Vitamin D - Oncology & hematology
Pharmaceuticals & Vitamin D - Immunity & auto-immune

CONTACT INFORMATION

For current licensing status, please contact John Nagel at inagel@warf.org or (608) 265-7956.
