

Over-Expression Of Azf1 Improves The Rate Of Anaerobic Xylose Fermentation In Engineered Yeast Strains

[View U.S. Patent No. 11,591,376 in PDF format.](#)

WARF: P160421US02

Inventors: Audrey Gasch, Kevin Myers

The Invention

The present invention provides an isolated AZF1 gene sequence, recombinant vectors, and recombinant yeast which are useful in methods of enhanced biofuel production, particularly ethanol production. Methods of bioengineering recombinant yeast with isolated AZF1 gene sequence useful for biofuel production are also provided.
