

Disposable Speculum For Digital Otoscope

[View U.S. Patent No. 10,925,478 in PDF format.](#)

WARF: P190183US01

Inventors: James Berbee, Gregory Rebella, Azita Hamedani, Patrick Ayerle, Thomas Hutcheson IV, Ralph Paul

The Invention

A disposable speculum for an otoscope provides a sheath adapted to cover an elongate otoscope probe and providing inwardly extending tabs that are adapted to flex outward when the speculum is inserted over the otoscope to engage corresponding grooves of the otoscope. The inwardly extending tabs provide precise alignment of the speculum with the elongate otoscope probe along an insertion axis to protect a length of the probe.
