

CALIBRATION TOOL FOR TISSUE TENSION SENSOR

[View U.S. Patent Application Publication No. US-2024-0180530 in PDF format.](#)

WARF: P230020US01

Inventors: Darryl Thelen, Alex Reiter, Peter Adamczyk

The Invention

UW-Madison researchers have developed a calibration device for use with their tensiometer device. The load measurement device electronically pairs with the tensiometer system to calibrate the tissue wave speeds measured via tensiometry to tissue force based on force measured at the foot. This calibration is done on each subject.
