

Composition For Therapeutic And Cosmetic Botulinum Toxin

[View U.S. Patent No. 7,459,164 in PDF format.](#)

WARF: P05055US

Inventors: Gary Borodic

The Invention

This invention relates to a composition of botulinum based pharmaceuticals used for therapeutic and cosmetic treatment. This invention offers an improvement on the prior art by eliminating the potential of blood-borne contamination with botulinum based pharmaceuticals. Recombinant serum albumin is taught for use in the place of human serum albumin as a stabilizing or enhancing agent.

Tech Fields

- [Therapeutics & Vaccines : CNS](#)
