

Influenza M2 Protein Mutant Viruses As Influenza Live Attenuated Vaccines

[View U.S. Patent No. 9,474,798 in PDF format.](#)

WARF: P07509US

Inventors: Yoshihiro Kawaoka, Tokiko Watanabe

The Invention

A method to prepare recombinant influenza viruses comprising a mutant M2 protein which has a deletion of two or more residues in the cytoplasmic tail and is attenuated in vivo, is provided, as well the resulting virus and vaccines with the virus.
