

Metabolic Biomarkers Of Autism

[View U.S. Patent No. 9,547,013 in PDF format.](#)

WARF: P09343US02

Inventors: Gabriela Cezar, Alan Smith

The Invention

This invention provides methods and biomarkers for diagnosing autism by identifying cellular metabolites differentially produced in autistic patient samples versus non-autistic controls. Methods for identifying a unique profile of metabolites present or secreted in brain tissue, cerebrospinal fluid, plasma, or biofluids of autistic samples are described herein. The individual metabolites or a pattern of secreted metabolites provide metabolic signatures of autism, which can be used to provide a diagnosis thereof.
