

Nonvolatile Range-Checking Content Addressable Memory

[View U.S. Patent No. 9,711,221 in PDF format.](#)

WARF: P160003US01

Inventors: Jing Li

The Invention

A computer memory provides for range-matching capabilities using a hybrid combination of transistors and multiple resistive memory devices serving in a dual capacity as storage and logic. The result is an extremely compact, nonvolatile range-matching, content addressable memory.

Tech Fields
