

Computer Architecture With Synergistic Heterogeneous Processors

[View U.S. Patent No. 11,513,805 in PDF format.](#)

WARF: P170013US01

Inventors: Karthikeyan Sankaralingam, Anthony Nowatzki

The Invention

A computer architecture employs multiple special-purpose processors having different affinities for program execution to execute substantial portions of general-purpose programs to provide improved performance with respect to a general-purpose processor executing the general-purpose program alone.
