

Neuromodulation To Modulate Glymphatic Clearance

[View U.S. Patent Application Publication No. US-2019-0201684 in PDF format.](#)

WARF: P170016US02

Inventors: Justin Williams, Kip Ludwig, Erika Ross

The Invention

The present invention provides materials and methods for using electrical stimulation to treat a mammal having a proteinopathy (e.g., neurodegenerative diseases) or at risk of developing a proteinopathy are provided. For example, the present invention provides materials and methods for modulating glymphatic clearance (e.g., enhancing glymphatic clearance) of pathogenic proteins.

Tech Fields

- [Medical Devices : Neurological devices](#)
