

Engineered Prephenate Dehydrogenases And Arogenate Dehydrogenases And Methods Of Using The Same

[View U.S. Patent No. 11,136,559 in PDF format.](#)

WARF: P170121US02

Inventors: Hiroshi Maeda, Craig Schenck

The Invention

The invention generally relates to engineered prephenate dehydrogenases and arogenate dehydrogenases and methods of using the same. More specifically, the invention relates in part to compositions including engineered prephenate dehydrogenases (PDH) polypeptides and engineered arogenate dehydrogenase (ADH) polypeptides with altered substrate preferences and tyrosine sensitivities and methods of using the same.
