

Alignment Of Carbon Nanotubes In Confined Channels

[View U.S. Patent No. 10,873,026 in PDF format.](#)

WARF: P170130US01

Inventors: Michael Arnold, Katherine Jenkins, Padma Gopalan, Gerald Brady

The Invention

Methods for forming carbon nanotube arrays are provided. Also provided are the arrays formed by the methods and electronic devices that incorporate the array as active layers. The arrays are formed by flowing a fluid suspension of carbon nanotubes through a confined channel under conditions that create a velocity gradient across the flowing suspension.
