

## Method Of Creating Human Pluripotent Stem Cell Derived Brain Pericyte-Like Cells

[View U.S. Patent No. 11,643,636 in PDF format.](#)

**WARF: P170340US02**

Inventors: Eric Shusta, Sean Palecek, Matthew Stebbins

---

### The Invention

A population of brain pericyte-like cells, wherein the cells express pericyte markers but do not express ACTA2 and wherein the cells are generated from hPSCs, is disclosed herein.
