

Structured Nanocoatings For The Stabilization Of Pluripotent Stem Cell Media Components

[View U.S. Patent Application Publication No. US-2021-0145757 in PDF format.](#)

WARF: P180169US02

Inventors: William Murphy, Andrew Khalil, Angela Xie, Hunter Johnson

The Invention

Disclosed are compositions and methods for pluripotent stem cell culture. Compositions include mineral coated microparticles having a core and a mineral coating, wherein the mineral coating includes fibroblast growth factor. Also disclosed are methods for pluripotent stem cell culture methods using mineral coated microparticles including fibroblast growth factor.
