

Humanized Cell Line

View U.S. Patent No. 11,851,648 in PDF format.

WARF: P180301US03

Inventors: Yoshihiro Kawaoka, Kosuke Takada, Masaki Imai

The Invention

A mammalian or avian cell line that expresses high levels of human influenza virus receptors is provided. In one embodiment, the cell line supports human influenza virus, e.g., human A/H3 influenza virus, isolation and growth much more effectively than corresponding conventional (unmodified) cells or in corresponding human virus receptor-overexpressing cells, and the propagated viruses may maintain higher genetic stability than in the corresponding cells.

Tech Fields

• Therapeutics & Vaccines : Vaccines
