

Cyphomycin, Compositions And Uses Thereof

[View U.S. Patent No. 11,028,113 in PDF format.](#)

WARF: P180334US02

Inventors: Cameron Currie, Timothy Bugni, Monica Pupo, David Andes, Humberto Ortega Dominguez

The Invention

Cyphomycin, an isolated compound of Formula I or IA is provided. A compound isolated from insect *Streptomyces* and having a chemical formula of C₇₇H₁₂₂O₂₆ is also provided. Compositions including Cyphomycin, such as pharmaceutical compositions including effective amounts of Cyphomycin for treating fungal infections such as *Candida* and *Aspergillus*, including drug-resistant strains thereof, are also disclosed. Methods of treating fungal infections with Cyphomycin and compositions thereof are disclosed.
