

Non-Collinear Antiferromagnets For High Density And Low Power Spintronic Devices

[View U.S. Patent No. 10,804,459 in PDF format.](#)

WARF: P190064US01

Inventors: Chang-Beom Eom, Tianxiang Nan

The Invention

Spintronic devices based on metallic antiferromagnets having a non-collinear spin structure are provided. Also provided are methods for operating the devices. The spintronic devices are based on a bilayer structure that includes a spin torque layer of an antiferromagnetic material having a non-collinear triangular spin structure adjoining a layer of ferromagnetic material.
