

High-Energy Plasma Generator Using Radio-Frequency And Neutral Beam Power

[View U.S. Patent No. 10,966,310 in PDF format.](#)

WARF: P200187US01

Inventors: Cary Forest, Jay Anderson, John Wallace, Robert Harvey, Yuri Petrov

The Invention

An apparatus for generating a highly energetic plasma employs a low-energy neutral beam injected into a magnetically contained mirror plasma to produce plasma ions boosted in energy to fusion levels by a coordinated radiofrequency field.
