

Medical Facemask Dispenser

WARF: P200321US02

Inventors: Joshua Glazer, Adam McNeilly

The Invention

The present invention is an automatic mask dispenser handles procedure masks of a type having filtration material inside ear loops by use of a high engagement material on a movable surface that can selectively remove the lowermost mask. In one embodiment opposed moving surfaces are provided to fold the mask hygienically about its inner surface for dispensing to the user.
