

COLD-SPRAYED TANTALUM COATINGS AND RELATED METHODS

WARF: P220126US02

Inventors: Oliver Schmitz, Kumar Sridharan, Mykola Ialovega, Hwasung Yeom, Tyler Dabney, Danah Velez, Marcos Navarro Gonzalez, Evan Willing

The Invention

UW-Madison researchers have developed cold-sprayed tantalum coatings configured to absorb a hydrogen species from an atmosphere, e.g., a gaseous region surrounding a plasma. The technology can be applied to devices and includes methods of forming and using the coatings.
