

Transgenic Mouse Expressing Human GFAP (Model Tg73.7)

WARF: P220166US01

Inventors: Albee Messing, Michael Brenner

The Invention

UW-Madison researchers have developed a transgenic mouse, designated Tg73.7, that carries full-length copies of a human genomic clone of wild-type GFAP, including all introns and exons.

Tech Fields

- <u>Drug Discovery & Development : Disease models</u>
- Drug Discovery & Development : Preclinical testing
- Research Tools: Animal & disease models
