

## ORAL BITE BLOCK FOR ENDOTRACHEAL TUBE

**WARF: P230240US01**

Inventors: Joshua Medow, Matthew Roggensack

---

### The Invention

A UW Madison physician and local dentist have designed a specialized bite block device for use with endotracheal tubes. The device protects the front teeth by using the molars on both sides of the jaw to prevent the jaw from closing and compressing the ET tube. This disposable device will come in various sizes.
